SCR for Data Centers

Meet the regulations and ease your operations

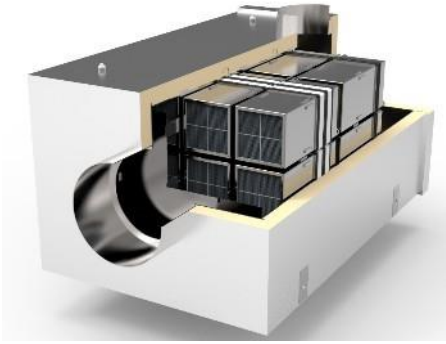
hugengineering.
A FAURECIA COMPANY

benefits

- **Global regulations & local air permits** full compliancy
- **Increase yearly operating time** and/or size of the stand-by plant by lessening annual overall emissions.
- **Abetment of HAPs, NOx, CO, HCs, noise** and exhaust opacity
- **Closed-loop control system** for ammonia slip minimization
- **Linearly Scalable** for an easy expansion in successive steps

technical description

- **Modular system** available as defined sets of items providing process control, unit operations and utilities
- **Mechanical equipment** with multi-purpose design resulting in comprehensive packaging feasibility also for customized and/or combined solutions
- **Selection of different catalytic materials** to meet also challenging emissions limits



applications

- **Data center backup plants**
- **Mission critical/emergency**
