

The DPF solution for your genset

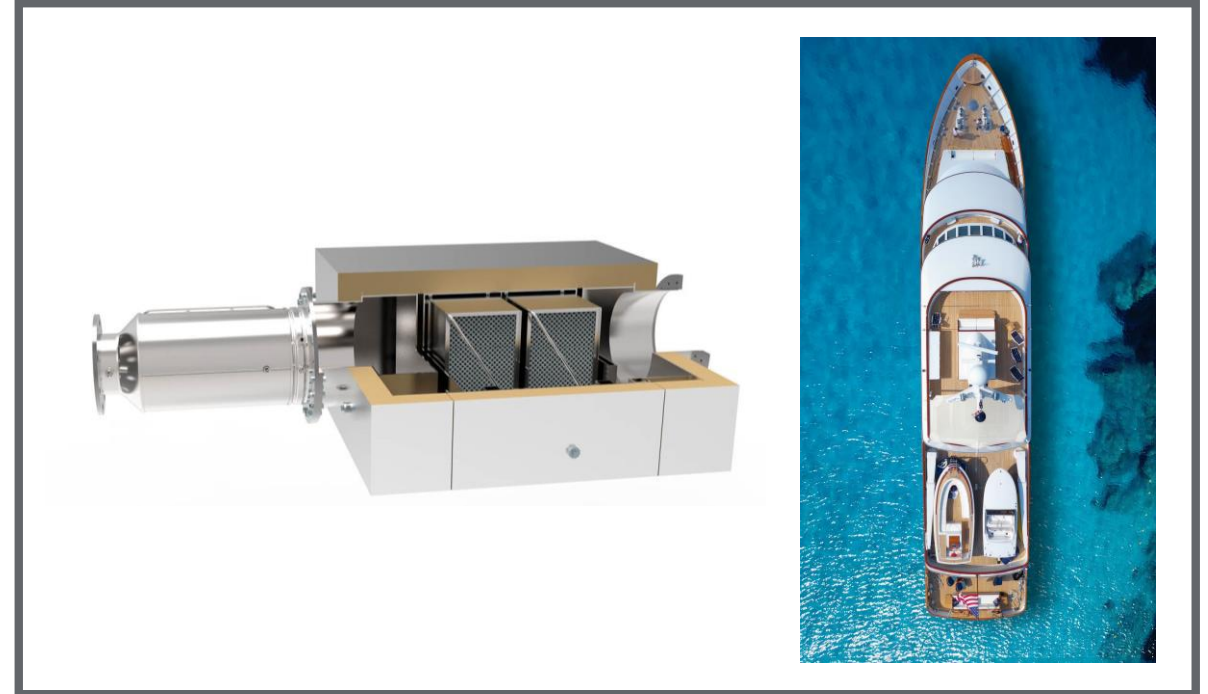

Have a clean deck

benefits

- Active regenerated DPF reduces black carbon emissions up to 99%
- No water contamination by soot and oil
- Always clean upholstery and teak
- Fully automated DPF regeneration independent of engine operation
- Integrated load-bank function to keep your engine clean

technical description

- For diesel gensets in the range of 55kW to 200kW
- 208V or 400V supply voltage
- Very low maintenance required due to absence of moving parts
- Integrated soot load control assures minimal fuel penalty
- Highly flexible integration into any engine room design
- No Sulfur limitation on MDO fuel

applications

- Diesel gensets up to 200kW
- Displacement or planning hull Yacht
