

## Press Release

### **HUG ENGINEERING BECOMES PART OF FAURECIA CLEAN MOBILITY FOR EMISSION CONTROL FOR HIGH HORSEPOWER ENGINES**

Elsau (Switzerland), March 1<sup>st</sup>, 2018 +++ Hug Engineering AG, specialist in exhaust gas purification, has announced that the closing of the takeover by French Faurecia has successfully taken place effective from March 1<sup>st</sup>, 2018.

With this transaction, Hug Engineering will complement Faurecia's clean mobility business unit with exhaust gas aftertreatment products for high horsepower engines. Faurecia is a global leader in clean mobility in the automotive industry.

The combination of Faurecia's global reach and world leading innovative systems for commercial vehicles with Hug Engineering's systems expertise will facilitate the future growth rapidly in the high horsepower market, as regulations come into force.

"We are looking forward to the strategic opportunities by our new parent company", says Stefan Fuss, CEO of Hug Engineering.

High horsepower engines are used in marine propulsion, power generation, rail and agricultural applications and other industries. The market for emissions purification systems for these engines is expected to grow rapidly in the future.
