

SCR for Data Centers

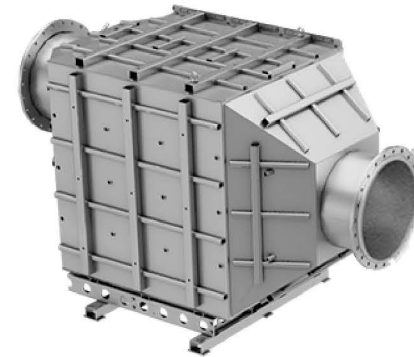

Meet the regulations and ease your operations

benefits

- **Global regulations & local air permit** compliant
- **Increase yearly operating time** and/or size of the stand-by plant
- **Reduction of HC, NOx, noise** and exhaust opacity
- **Closed-loop control system** with ammonia slip minimization
- **Scalable** for an easy expansion

technical description

- **Modular system** available as defined sets of items providing process control, unit operations and utilities
- **Mechanical equipment** with multi-sectional design resulting in packaging feasibility also for customized and/or combined solutions
- **Selection of different catalytic materials** to meet also challenging emissions limits

applications

- **Data center backup plants**
- **Mission critical/emergency**
