

Comfort Fusion

Ensuring compactness, low noise, and clean exhaust

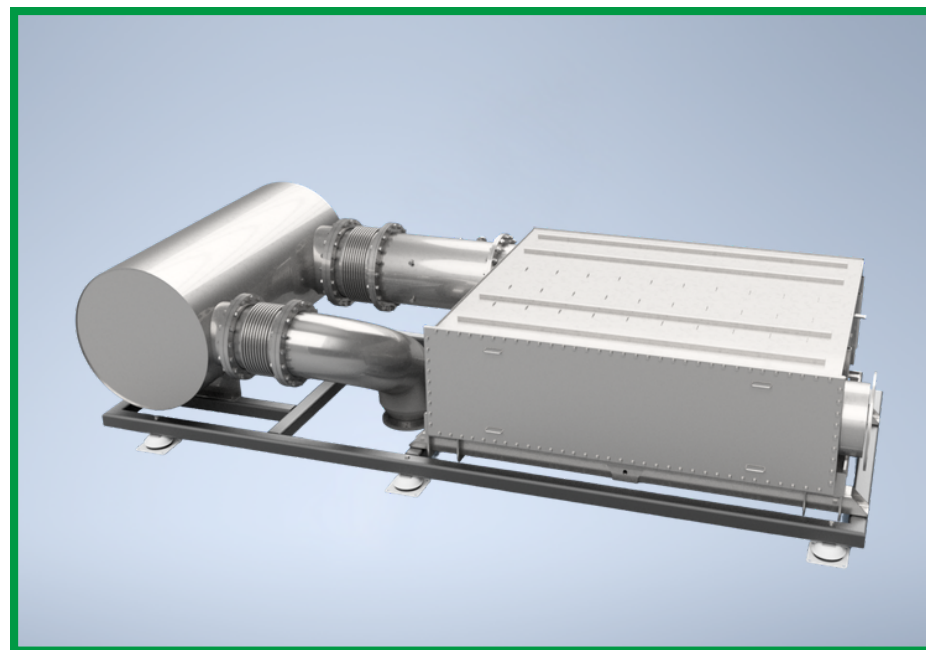

hugengineering.
We clean emissions

BENEFITS

- **Compact, easy to install** - optional carrying frame with rubber mounts
- Integrated silencer delivering **35 dBA sound attenuation**
- **Proven Hug fuel burner** for reliable regeneration
- Extended DPF service intervals - **up to 9,000 h**, reducing cost & downtime
- **Global Hug support**, backed by in-house catalyst & DPF brick manufacturing

TECHNICAL DESCRIPTION

- Integrated **BIE injection tube** with Hug burner - regeneration every 20 h
- Silencer fabricated in **16Mo3**, converter and injection tube in stainless steel
- **Front-side service** access for DPF and SCR - easy maintenance
- CFD-optimized design for efficient dosing and low urea consumption
- Optional **NOx Measurement Device** - eliminating annual spot checks

APPLICATIONS

- Diesel-electric gensets
- Yachts and commercial vessels

innovation
